| Chaos Toolkit | Alt. Terminology |
|------------------|------------------|
| target-service | artifact |
| fault repetition | occurrence |
| ... | ... |

Alt. Terminology

EXPERT USER STUDY: SELECTED RESULTS

EXPERT USER STUDY: LESSONS LEARNED

Domain experts can model their business questions easily and understand the representation of the RQA results, but...

Information Fields

Accompany Apdex ratings with **actual reference values**

Difficult to **understand** some fields (load peak design, ...)

Result Presentation

More **facts** regarding test runs

More **compact** representation

Summary suggests **interpretation**

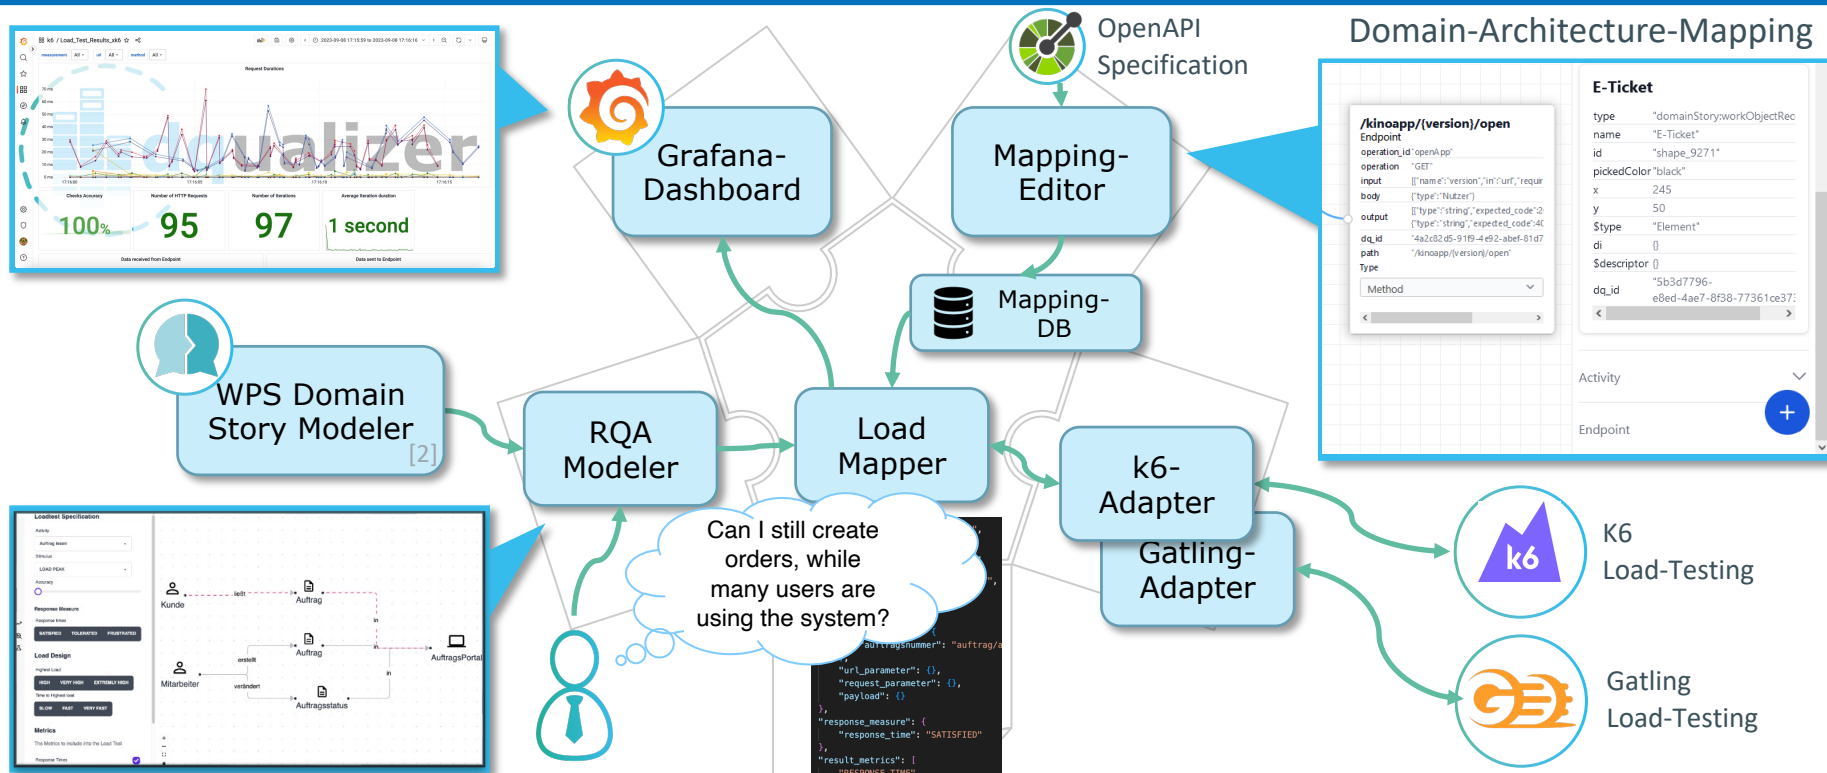

Limitations

Putting RQA on **single element** of domain story

Limitations of Domain Story Modeler

DQUALIZER: CURRENT STATE

[2] <https://egon.io/>

CONCLUSION

FUTURE WORK

Just Completed / Work In Progress

- **Suggestions** for Quality Scenarios
- Reengineering of the WPS **DomainStory-Modeler**
- Generate **Monitoring** from Domain Stories
- **Presenting** Monitoring data to Domain Experts
- Executable **Case Study** based on real Domain Stories and System

Scheduled

- Complex and flexible **Quality Scenarios**
- Integration of **Resilience Testing and Monitoring tooling**
- ...
